Issue: August

Greetings!

Dear Guest,

Please continue to enjoy our newsletter each month. We love feedback so feel free to contact us with suggestions on content you would like to hear more about.

We tailor your business ERP, Accounting and CRM software solutions. We listen and learn about you and your business needs and help your organization access the data needed to be efficient and effective. Michael Ericksen P.C. helps you determine the value of solving your problems. We do this by tailoring the software solution and support system we propose and integrate for you.

If your accounting system does not provide the information you need to run your business, perhaps now is the time to do a software business review and see what needs are not being met. Call us to schedule your FREE review today.

Project Tracking Made Easy

Many people do not get the most out of their accounting system because they think it is too difficult to use. In some cases that is true, but Sage Pro has a nice module Project Accounting that is very easy to use.

If you are already using Sage Pro there is virtually no training required to use Project Accounting. This is because you use the software as

normal and all you do is add a project code to any transaction. You can add a project code to a sales order or invoice. You can also add a project code to an inventory transaction, or a purchase order or any payable. When you are entering a transaction, not all lines may be part of a project. No problem, since when you turn on the project accounting feature, the project field is optional. Reporting is done by Project Accounting pulling the information for all the other modules to produce reports.

So if you are using spreadsheets to track costs, perhaps you should look into your accounting system to see if they can produce the information you need without re-entering data. One of the primary principles we use when reviewing how a company operates is to enter data only once. For one client, I did a review of a department in a large company and found that one piece of data was entered up to four times. We revised how data was captured and eliminated the duplication of effort. This produced a great time saver and also significantly reduced the errors in the data. Tools like the Sage Pro Project Accounting module can be a great help.

- Corporate Finance
- CPE Walking Tour
- Intuit Academy
- Practice Management
- Tax
- Technology

I am determined to make a difference in the fight against Alzheimer's disease. I'm committed to raising awareness and funds for Alzheimer research, care and support. My goal is \$1000 personally, and I will be walking on Septemeber 26th in Naperville, IL.

Currently more than 5 million Americans have Alzheimer's, and 78 million baby boomers are at risk - unless we find a way to change the course of this disease.

I want to do my part to fight Alzheimer's, but I need your support! Please make a donation to help the Alzheimer's Association advance research into prevention, treatments and a cure for Alzheimer's. For the millions already affected by the disease, the Association offers care, education, support and resources in communities nationwide.

In support and honor of my Nani, LaVerne Sereno. This is my second year participating in the 2010 Alzheimer's Association Memory Walk® and I raised \$700 personally last year. I hope to surpass my numbers for this year with your help !

Thank you for supporting my efforts. We're on the MOVE to end Alzheimer's!
